## RECENT PROJECTS

### Replicating Keras Model ©

2019

- A personal project born out of curiosity about AI and machine learning
- Currently replicating the features of the Keras Model ©
- Close to replicating Multi-Layer Preceptors and Convolutional NN

### Sales Application

2019

- 2-part project completed with an A as part of the Software Design course, including a console application built in Java, and an Android application built in Android Studio
- Uses JavaSQL to employ a database in the backend
- Has most of the functionality of shopping apps such as Amazon etc
- Has the added functionality of hosting role-based accounts (e.g. Admin, Employee, Customer) with different features and accessibility available

### High School Official Website

2018

- Part of a team of 5 students who were commissioned with the complete rebuilding of the school website
- Teamed up with a tech company, Bolt Labs Pakistan, to accomplish the task
- Delivered a completely uplifted and highly interactive website
- Parent's guild was given the spotlight, membership jumped 50%
